NAPIT

The leading supplier of custom built EV canopies & structures

Truecharge are a leading manufacturer of custom structures for transportation applications, including EV charge canopies, shelters, covered walkways, docking stations, glazed screens and waiting rooms.

Working in collaboration with the EV charging industry, EV charging suppliers, architects, scheme designers, main contractors, cities, government & local authorities, Truecharge has over 50 years of experience, with over 150,000 structures installed Worldwide. We are global leaders in the provision of public transportation, intelligent mobility, Smart City, low, ultra-low and zero emission mobility solutions.

Bespoke Manufacturing & Installation Services

Truecharge's comprehensive in-house design, engineering and manufacturing resources enables the timely, cost effective supply and installation of fabricated architectural structures to suit any client requirements. Over the years Truecharge have provided award winning structures for a wide range of applications.

All of Truecharge's structures are fully engineered to the highest standards and can be supplied in a range of elegant, robust materials and finishes to suit individual architectural requirements and to exacting customer requirements.

Our many years of experience enables us to provide high quality custom built products that are easy and cost effective to install, erect and maintain.

Standard 'Off the Shelf' Products also Available

In addition to our custom design and manufacturing services, we also have a comprehensive range of standard 'off the shelf' shelters, canopies, covered walkways and glazed screens.

SPECIALIST AREAS OF OPERATION

- Construction Related Fabrication Services
- Transport & Airport Infrastructure Fabrication
- Stainless Steel & Aluminium Fabrication
- Laser Cutting and Forming
- CAD Design & Specialist Engineering
- Specialist Finishing Services
- Signage Graphics Production
- Project Management
- Nationwide Installation & Site Fitting
- Modular Construction & Site Erection

SECTORS & INDUSTRIES SERVED

- Electric Vehicle Charging
- Bus Stations & Interchanges
- Bus Rapid Transit
- Train Stations
- Tram & Light Rail Networks
- Airports
- Cycle Storage
- Schools
- Colleges & Universities
- Shopping Centres & Retail

Materials & Finishes Available

Our structures can be supplied in a range of materials & finishes to meet any requirement, including:-

MATERIALS

- Stainless steels
- Steels / Galvanised
- Aluminium
- Glass
- GRP - Glass Reinforced Plastic Composites
- GRC - Glass Reinforced Concrete
- Stones and granites
- Composite stone materials
- Timber

FINISHES

- Brushed, satin and linen finish stainless
- Shot peened stainless
- Polyester powder coated - all colours
- Galvanizing
- Anodizing
- Anti-graffiti coatings
- Custom Finishes

Additional Features & Accessories

Our structures can be supplied with a range of accessories, including: -

- Seating
- Lighting & Solar Power Lighting
- Range of glazing options
- Automatic sliding doors
- Heating & air conditioning
- Advertising displays
- Rainwater management
- Signage and custom printed graphics
- Digital Information and Advertising Displays
- CCTV Cameras
- Anti-Graffiti Protective Coatings
- Bomb Blast Protection
- Solar Power Lighting

Design & build services

Working in collaboration with the EV charging industry, EV charging suppliers, architects, scheme designers, main contractors, cities, government & local authorities, we have over 50 years of experience, with over 150,000 structures installed Worldwide. We are global leaders in the provision of public transportation, intelligent mobility, Smart City, low, ultra-low and zero emission mobility solutions.

Design & Engineering Services

- Concept designs
- 3D visualizations & renderings
- Animations and walk throughs
- CAD manufacturing drawings
- Structural engineering
- Foundation designs
- Prototyping & product testing

Manufacturing Services

- Full manufacture & fabrication Service
- Architectural metalwork
- Structural Steelwork
- Laser cutting and forming
- Specialist Finishing Services

Collaboration with clients, architects & designers From concept to manufacture - a seamless process

Installation, Site Fitting & Erection Services

Truecharge provide a comprehensive nationwide assembly, erection, site fitting and construction supervision.

Services Include:-

- Civils & Excavation
- Foundation Construction
- Installation & Erection
- Project Management
- Electrical Connection & Commissioning
- Cable Jointing
- RTI Support Services
- RTI/ITS System Commissioning
- Testing & Certification
- Maintenance
- Emergency Call Out Services

Modular Construction Techniques

Truecharge employs modular construction methods which allows the construction of technically complex fabricated metalwork structures to be undertaken quickly and safely by minimising on-site construction times.

Factory fabricated and pre-assembled, the sub-assembled parts are packaged and shipped to site. After delivery, the components can be readily assembled, allowing reduced site occupancy times, reduced costs and shorter programme times.

Project Management

Truecharge's experienced, well-trained and disciplined project managers follow proven project management procedures.

Utilisation of leading planning and management tools gives Truecharge full control of quality, cost and programme and ensures successful project management.

Strict adherence to all company quality and health and safety processes ensures a high quality product and a safe working site. Truecharge are able to give an individual response to the needs of each project and respond quickly and accurately to changes wherever they occur.

Bespoke Structures

World leaders in public transport infrastructure

Bus • Rail • Bus Rapid Transit • Airports • Tram • Cycling

truecharge

THE UK'S LEADING MANUFACTURER OF EV SHELTERS & CANOPIES

Why choose Truecharge?

Truecharge are one of the UK's leading manufacturing and technologies companies.

Truecharge is part of the Trueform Manufacturing & Technology Group, one of the UK's leading manufacturing & technologies companies. Established over 50 years, Truecharge specialise in the design, manufacture and assembly of EV shelters, canopies and roadside infrastructure technology. Our products are manufactured in house, within our UK based manufacturing and technology centre.

Utilising innovative design, engineering and advanced manufacturing techniques, Truecharge has provided over 150,000 products at premium locations in major cities throughout the UK and the rest of the World.

Our mission - to provide the infrastructure needed for the World's transition to sustainable mobility

To harness the very best of design, innovation, technology, advanced manufacturing and engineering to create award winning product and technology solutions that promote and facilitate low carbon mobility solutions that reduce carbon emissions, improve air quality and protect the environment.

Truecharge are a leading ESG company (Environmental, Social and Governance). Truecharge's green street infrastructure products assist organisations achieve ESG - the three central factors in

measuring sustainability and societal impact.

Truecharge's comprehensive in-house engineering and manufacturing facilities enables the timely, cost-effective production to suit any client requirements. Over the years Truecharge have provided award winning products and structures for a wide range of applications.

Our many years of experience enables us to provide high quality products that are robust, vandal resistant and cost effective to install and maintain.

Whatever the level of support required, Truecharge can help with our range of services for the design and/or manufacture of bespoke product solutions. Truecharge's experts will work with you to engineer a solution which meets your aesthetic, functional, performance and cost requirements.

Truecharge believe strongly in social value. We provide products that support local communities to improve economic, social and environmental wellbeing through enhancements in, zero carbon mobility, public transportation, active travel and community engagement. We are partners with Woodland Trust, Crisis and Sustrans.
